Introduction to Scatter Plot of Administered vs Distributed Doses

y-axis

x-axis

Red Diagonal Lines

Administered Doses = Distributed Doses x Administration Efficiency

$$\left[\frac{\text{Administered Doses}}{\text{Population}} \right] = \left[\frac{\text{Distributed Doses}}{\text{Population}} \right] \times \left[\frac{\text{Administered Doses}}{\text{Distributed Doses}} \right]$$

1. The dashed lines can be thought of as 'jet plumes' showing the trajectory of each state since the previous CDC report.
2. Since the doses are cumulative, the dashed lines will always move upward and to the right.
