Derivation of Open Space Quantities (2020)

January 1, 2020

A subcommittee of the commission (Coyle, Kace, Cronin) has undertaken a review of potential Ridgefield open space properties (Figure 1) to ascertain if our current accounting reflects considerations identified in the *DEEP Comprehensive Open Space Acquisition Plan* (referred to as the *2016-2020 Green Plan*). Open space is defined by DEEP as:

Any area of undeveloped or relatively natural land, including forest land, land designated as wetland under section 22a-30, and not excluding farm land, the preservation or restriction of the use of which would:

- maintain and enhance the conservation of natural or scenic resources,
- protect natural streams or water supply,
- promote conservation of soils, wetlands, beaches or tidal marshes,
- enhance the value to the public of abutting or neighboring parks, forest, wildlife preserves, nature reservations or sanctuaries or other open spaces,
- enhance public recreation opportunities, or
- preserve historic sites.

Open space does not mean undeveloped natural land or land with an unofficial passive recreational use. For land to be termed “open space”, it must be preserved or protected for open space use:

- **Preserved Open Space** – An area of land that has been acquired and is used for open space purposes. Includes DEEP’s State Parks, State Forests, and Wildlife Areas, and Class I and II watershed land.
- **Protected Open Space** – Any area of land with a restriction that would limit its use to open space. Includes lands subject to conservation restriction, deed restriction, or certain reserved rights.

The results of this exercise are presented in the summary tables on the following pages. The conclusion of this effort resulted in a somewhat lower estimate of open space than what we had been using. As shown in Table 1, total estimated open space in Ridgefield is estimated at 5,636 acres, or 25.2 percent of the Town’s 22,387 acres of land. Thus, we are 1,080 acres short of our 30% goal of 6,716. Our web site currently reports 5,800 acres, or 26 percent.
