## Introduction to Scatter Plot of Administered vs Delivered Doses

**y-axis**

**x-axis**

**Red Diagonal Lines**

*Administered Doses* = *Distributed Doses* x *Administration Efficiency*

$$\left[ \frac{\text{Administered Doses}}{\text{Population}} \right] = \left[ \frac{\text{Delivered Doses}}{\text{Population}} \right] \times \left[ \frac{\text{Administered Doses}}{\text{Delivered Doses}} \right]$$

1. The dashed lines can be thought of as 'jet plumes' showing the trajectory of each state since the previous CDC report.
2. Since the doses are cumulative, the dashed lines will always move upward and to the right.
