## Connecticut and US Vaccination Summary

Connecticut (as of Thursday March 18, 2021)	Cumulative	Daily
Doses Delivered	1,820,525	30,806
Doses Administered	1,514,945	30,092
Percent of Population Who Have Completed Vaccination	15.24%	
Connecticut Rank Among 50 States and DC	6	
Percent of Population Who Have Initiated Vaccination	27.88%	
Connecticut Rank Among 50 States and DC	4	
United States (as of Thursday March 18, 2021)	Cumulative	Daily
Doses Delivered	151,108,445	2,853,854
Doses Administered	115,730,008	2,503,731
Percent of Population Who Have Completed Vaccination	12.38%	
Percent of Population Who Have Initiated Vaccination	22.81%	
Data Source: <a href="https://covid.cdc.gov/covid-data-tracker/#vaccinations">https://covid.cdc.gov/covid-data-tracker/#vaccinations</a> .		
The Daily numbers are the most recent 7-day moving averages.		

# Number of Doses Administered Each Day

Data Source: <https://covid.cdc.gov/covid-data-tracker/#vaccinations>

# Cumulative Number of People Vaccinated (as Percent of Population)

# CDC Weekly Allocations for Connecticut

# Connecticut New Cases in Age 70+ are decreasing rapidly ... this appears to be due to increased vaccinations

## Simulation of Herd Immunity: Assumptions

1. Herd Immunity is achieved when 75% of the US population is fully vaccinated.
2. We replicate known history up to the first day of the simulation.
3. *We do not assume that people previously testing positive are immune ... they are still vaccinated.*
4. All residents eligible for their 2<sup>nd</sup> dose (21 or 28 days after 1<sup>st</sup> dose) will *receive it on the required day.*
5. Doses remaining after administering *all required 2<sup>nd</sup> doses are administered as 1<sup>st</sup> doses.*
6. Hence, we assume sufficient capacity to *administer all allocated doses without any delay or disposal.*
7. *We ignore potential 'vaccine hesitancy', i.e., we assume everyone eligible for vaccination takes it*

## Simulation of Herd Immunity: Assumed Dose Rates

1. The US Pfizer + Moderna dose rates remain at current levels
2. The Johnson & Johnson dose rate ramps up from current level to 1M doses per day on May 1

# Simulation of Herd Immunity

**NOTE: This is a computer simulation based on assumptions that will likely change in the future.**
