Connecticut and US Vaccination Summary

Connecticut (as of Wednesday March 03, 2021)	Cumulative	Daily
Doses Delivered	1,309,225	30,000
Doses Administered	1,061,375	21,335
Percent of Population Who Have Completed Vaccination	8.71%	
Percent of Population Who Have Started Vaccination	20.76%	
Connecticut Rank Among 50 States and DC	4	
United States (as of Wednesday March 03, 2021)	Cumulative	Daily
Doses Delivered	107,028,890	2,622,836
Doses Administered	80,540,474	2,010,790
Percent of Population Who Have Completed Vaccination	8.14%	
Percent of Population Who Have Started Vaccination	15.97%	
Data Source: https://covid.cdc.gov/covid-data-tracker/#vaccinations. The Daily numbers are the most recent 7-day moving averages.		

First and Second Doses Administered Each Day

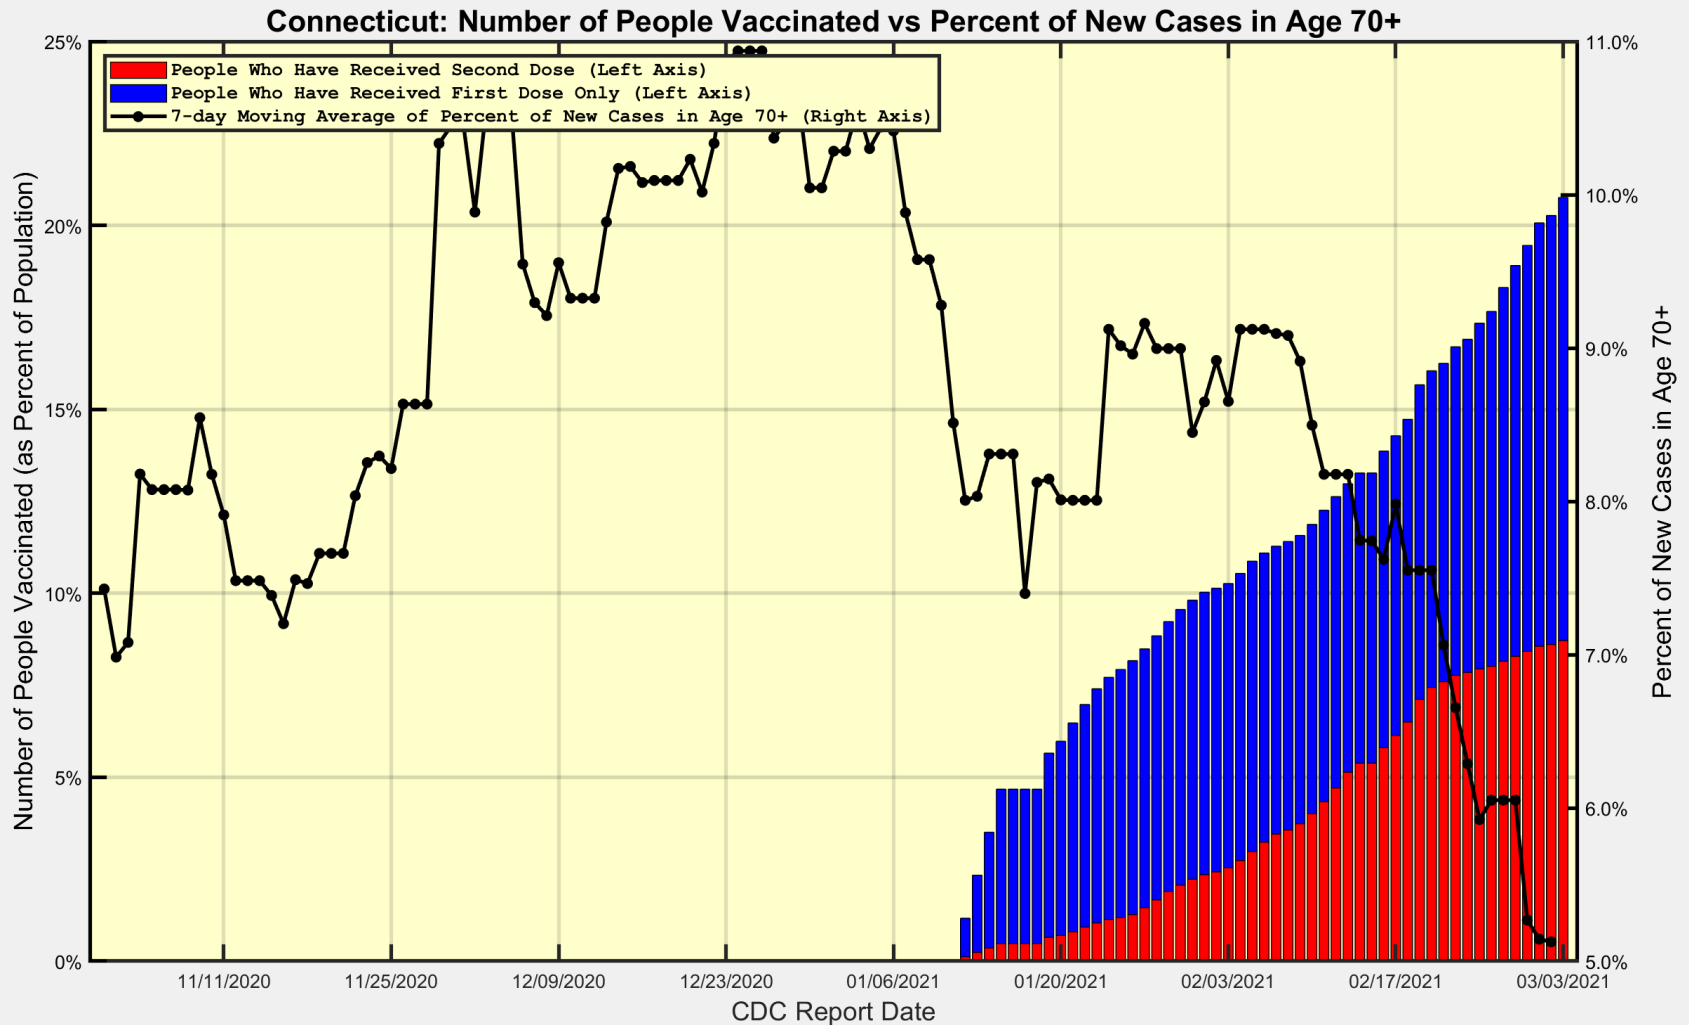

Data Source: <https://covid.cdc.gov/covid-data-tracker/#vaccinations>

Connecticut just received an allocation of 30,200 J&J vaccines for this week

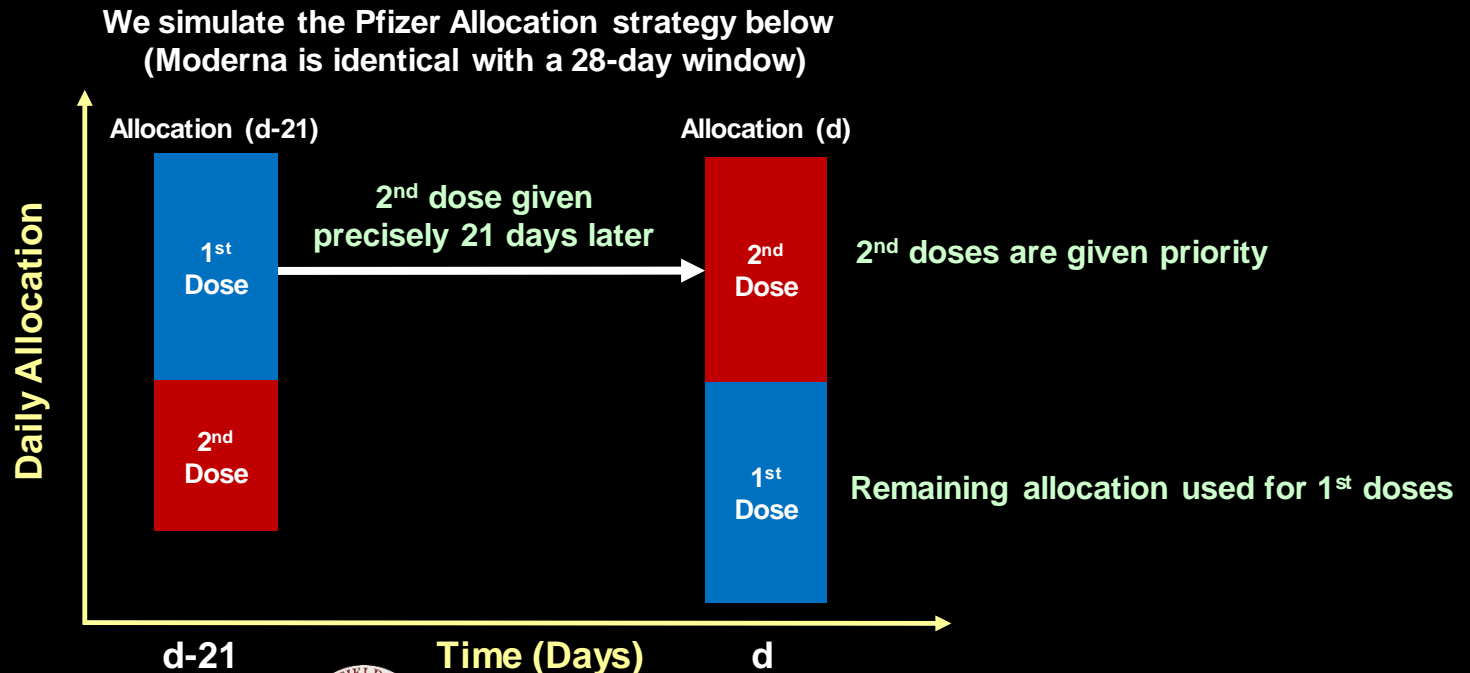

Connecticut New Cases in Age 70+ are decreasing rapidly ... this appears to be due to increased vaccinations

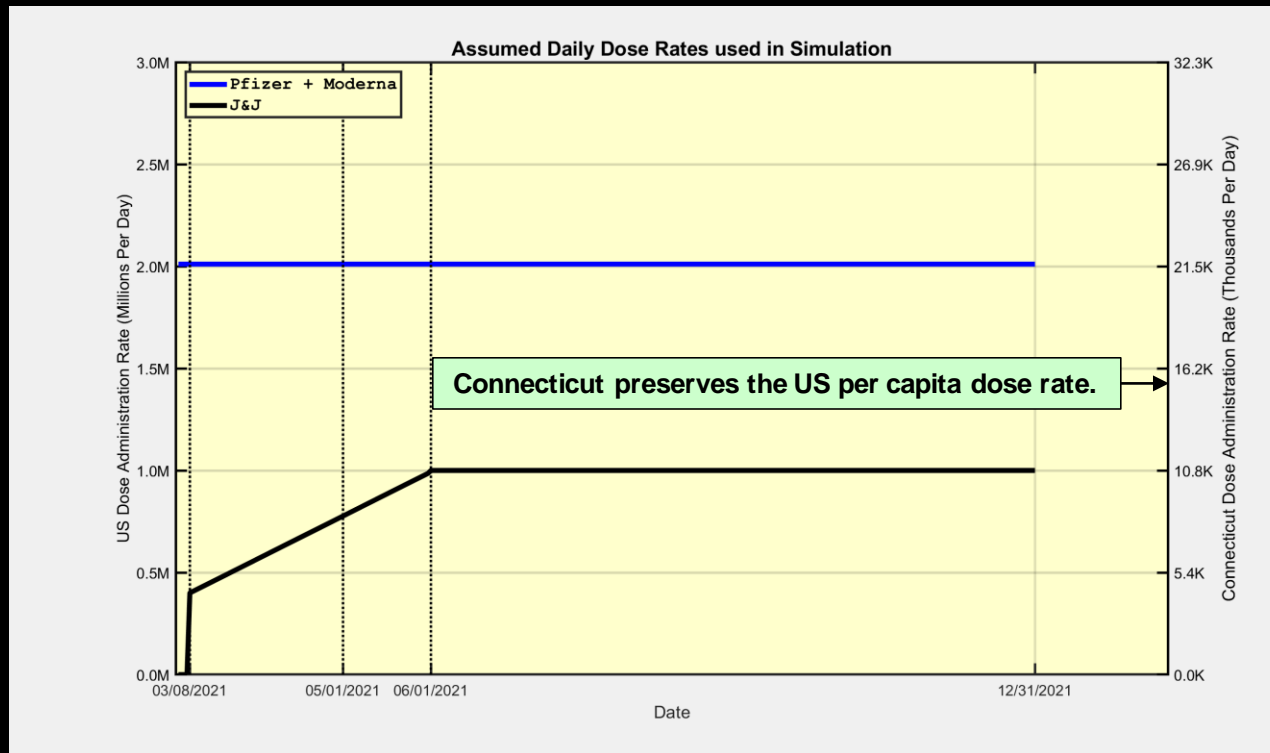

Simulation of Herd Immunity: Assumptions

1. Herd Immunity is achieved when 75% of the total population is fully vaccinated.
2. We replicate known history up to the first day of the simulation.
3. *We do not assume that people previously testing positive are immune ... they are still vaccinated.*
4. All residents eligible for their 2nd dose (21 or 28 days after 1st dose) will *receive it on the required day.*
5. Doses remaining after administering *all required 2nd doses are administered as 1st doses.*
6. Hence, we assume sufficient capacity to *administer all allocated doses without any delay or disposal.*
7. The administered doses are split evenly between Pfizer and Moderna.
8. The Johnson & Johnson vaccine becomes available on March 8 *with only one dose required.*

Simulation of Herd Immunity: Assumed Dose Rates

- The US Pfizer + Moderna Vaccines remain at current levels
 - The latest 7-day moving average of Pfizer + Moderna is 2.1M doses per day
- The Johnson & Johnson Vaccine becomes available on March 8
 - There is a linear ramp-up from March 8 (400K doses per day) to June 1 (1M doses per day)
 - *This results in 89.9M doses by June 30 ... consistent with J&J commitment of 100M doses by June 30*

Simulation of Herd Immunity

NOTE: This is a computer simulation based on assumptions that will likely change in the future.

Simulation of Connecticut Vaccination Rollout: Introduce J&J Vaccinations on 03/08/2021
