Connecticut and US Vaccination Summary

Connecticut (as of Wednesday April 14, 2021)	Cumulative	Daily
Doses Delivered	3,201,205	55,317
Doses Administered	2,572,005	49,286
Percent of Population Who Have Completed Vaccination	29.18%	
Connecticut Rank Among 50 States and DC	5	
Percent of Population Who Have Initiated Vaccination	45.72%	
Connecticut Rank Among 50 States and DC	3	
United States (as of Wednesday April 14, 2021)	Cumulative	Daily
Doses Delivered	250,998,265	3,671,976
Doses Administered	194,791,836	3,330,740
Percent of Population Who Have Completed Vaccination	23.17%	
Percent of Population Who Have Initiated Vaccination	37.44%	
Data Source: https://covid.cdc.gov/covid-data-tracker/#vaccinations . The Daily numbers are the most recent 7-day moving averages.		

Number of Doses Administered Each Day

Ridgefield COVID-19 Task Force

Cumulative Number of People Vaccinated (as Percent of Population)

CDC Weekly Allocations for Connecticut

Connecticut New Cases in Age 70+ are decreasing rapidly ... this appears to be due to increased vaccinations

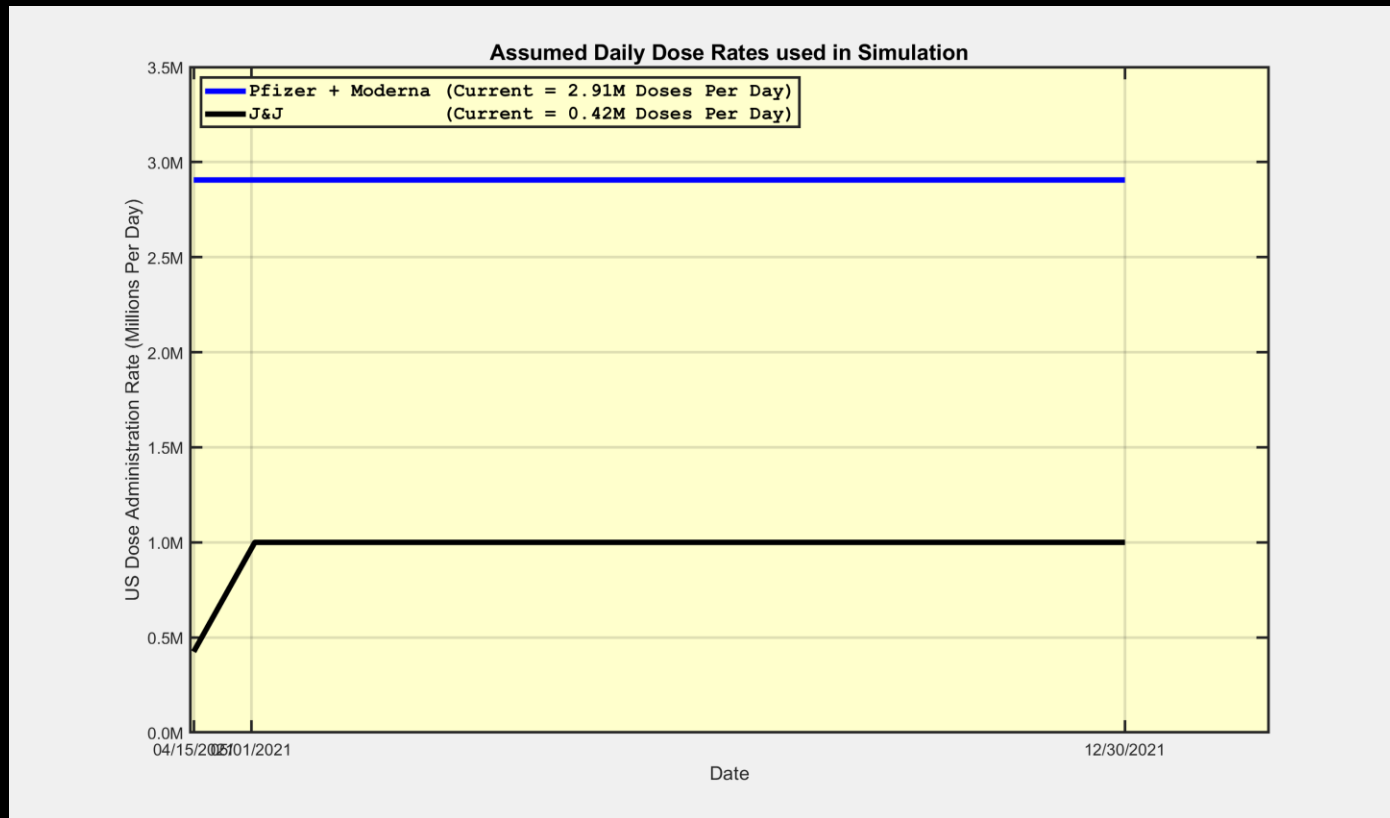

Simulation of Herd Immunity: Assumptions

1. Herd Immunity is achieved when 75% of the US population is fully vaccinated.
2. We replicate known history up to the first day of the simulation.
3. *We do not assume that people previously testing positive are immune ... they are still vaccinated.*
4. All residents eligible for their 2nd dose (21 or 28 days after 1st dose) will *receive it on the required day.*
5. Doses remaining after administering *all required 2nd doses are administered as 1st doses.*
6. Hence, we assume sufficient capacity to *administer all allocated doses without any delay or disposal.*
7. *We ignore potential 'vaccine hesitancy', i.e., we assume everyone eligible for vaccination takes it.*

Simulation of Herd Immunity: Assumed Dose Rates

1. The US Pfizer + Moderna dose rates remain at current levels
2. The Johnson & Johnson dose rate ramps up from current level to 1M doses per day on May 1
 - ▶ **IMPORTANT NOTE:** we are not including the potential impact of the April 13 FDA/CDC temporary halt on administering J&J vaccinations

Simulation of Herd Immunity

NOTE: This is a computer simulation based on assumptions that will likely change in the future.

Reaching Herd Immunity will be seriously challenged by Vaccine Hesitancy
