

Lucas Kaye's Eagle Project
Bridge on the Schlumberger Trail
8/8/20 – 9/15/20

BEFORE

Site of the bridge
before any work
took place.

AFTER

Photo of the
bridge from
approximately
the same
angle.

14' long,
4' wide, 3-4'
from surface to
bottom

Other angles of the bridge

Rock steps – Each side

Other work

Making a path out of rocks to fill a dip in the trail

Shoring up the stream bank with rocks

COST

Final cost of materials: **\$804.38**

This is higher than the originally approved total of \$500 because:

- New design criteria from Conservation Commission – made bridge sturdier and taller, but also more expensive, than originally-proposed design. This added about \$230 to the cost.
- Supply shortage – had to get some materials from other supplier – increased cost by about \$70 – decision OK'd by Commission.
