R. Marconi called the Board of Selectmen’s Meeting to order at 6:30pm.

1. Public Comment
Lynne Noyes of 43 Circle Drive East - Ms. Noyes was speaking for herself and her husband as well. Ms. Noyes has degrees in Plant biology and Conservation while her husband George has degrees in Aquatic Biology and Conservation. In their opinion, Turner Road is the home of some State protected species, and opening the long closed road will have a negative impact on them.

R. Marconi reminded the public that the purpose of the meeting is to look at the possibility of a maintenance agreement for this project. The BOS is strictly looking at this as a Town property, as they are not Planning & Zoning, or the Conservation Commission.

Gloria Driscoll - 9 Barnum Pl - Ms. Driscoll presented the BOS with a petition with approximately 400 signatures requesting the BOS to deny the opening of the closed portion of Turner Road as requested by Black Oaks, LLC.

Harold Moroknek - 34 Barnum Pl - President of the Turner Hill Neighborhood Association - Mr. Moroknek been a resident of Ridgefield since 1996. Mr. Moroknek believes this is a safety issue, and that the developer is trying to squeeze a development into an area where there just simply isn’t enough room. When Mr. Moroknek checked with the Fire Marshall to ask if there was an emergency situation, would there be enough room for all of their equipment, the response was that it would be “tight”.

Tracey O’Connor - Ridgefield Voters United (RVU) - The RVU strongly supports affordable housing. The development being discussed off Turner Road does not plan to provide handicapped accessibility, and on this basis alone the RVU believe that P&Z should not approve the current proposal. In the opinion of the RVU, any all-new 8-30g development should be fully ADA compliant. RVU recommends that the Turner Road remain closed.

Briggs Tobin - 35 Downesbury Ct. - Mr. Tobin is the Vice Chair of the Historic District Commission, which has two appointments on the BOS agenda this evening. Mr. Tobin wanted the BOS to know that these two appointees have the full support of the Commission behind them.

2. Turner Road Presentation & Discussion Only

Attorney Brian Smith, of Robinson & Cole was present representing the Black Oaks, LLC. Black Oaks, LLC is proposing a 9 unit development off Barnum Place. To access the developer is asking the Town’s permission to use a long unused road which the Town no longer uses or maintains. The BOS is reviewing a possible agreement to maintain a new roadway, on town property.

Steve Sullivan, Civil Engineer from CCA, the project engineer, described to the BOS what changes the LLC plans to make to the discontinued roadway. Attorney Smith mentioned, they are proposing a crosswalk, and an additional sidewalk on Turner Road and well as Barnum Place. Attorney Smith will work on the details of the road maintenance agreement with the BOS and the Town Attorney to ensure it’s worded to meet the Town’s requirements. The BOS raised many questions.

1. There was discussion about the size of the parking lot, in regards to an emergency vehicle having enough room to maneuver.
2. S. Connelly was concerned about the grade of the hill. Mr. Sullivan explained they would be change the grade of the hill so it wouldn’t be as steep.

3. There was some clarification as to where the proposed sidewalk would be.

4. R. Marconi expressed concern with regarding the steep embankment behind the building, and if the fire department would have access to the rear of the building. In response Mr. Sullivan said that they would be able to reach the back of the building on foot with ladders, and that the building would also have automatic sprinklers.

5. R. Marconi asked about the project’s ADA compliancy. Mr. Sullivan responded that because the building is under 10 units, they are not required to meet ADA requirements, but they are willing to do so.

6. There was discussion regarding the narrow road. There was concern about where the snow would be plowed in the winter.

The BOS is not prepared to sign the road agreement. There are many questions and concerns still to be considered. Mr. Smith agreed to supply the BOS with answers to questions.

Ms. Freeman explained that in the long term to be sustainable financially, she would need to have more sheep. She would require more land to have more animals. Scaling up is a gradual process. The new well has been completed through the State grant.

The BOS and Ms. Freeman discussed how many acres she uses, and how many acres she is planning to use. The terms of the additional acres under the new license agreement were satisfactory to all.

As part of the settlement agreement the logs and brush that were improperly taken down will be removed on or before May 30, 2020 under the supervision of the Conservation Commission.

There was a question from the audience asking how this had happened. R. Marconi explained that there were 5 or 6 large trees that had been cut down and were in the Town’s open space near one of the trails. They were found by a member of the Conservation Commission. Some discussion followed about how this type of destruction is monitored, and how the settlement is determined.
