The Water Pollution Control Authority's Wastewater Facilities Upgrade project includes construction of approximately 13,600 linear feet of new 8-inch diameter underground force main piping from the Route 7 Pump Station to the South Street Wastewater Treatment Facility. The existing Route 7 Pump Station will be demolished and replaced with a new pump station in the same location on Route 7. The existing Route 7 Wastewater Treatment Facility will be decommissioned and demolished. The work is anticipated to occur through February 2024.
